

FireSec Cabinet

- for protection of documents

Looking for a large cabinet to protect documents against fire and theft? Well, look no further. 'FireSec Cabinet' is an extensive cabinet which is ideal for storing vast amounts of information.

With enhanced locking and boltwork, combined with heat insulated body and doors, FireSec Cabinet shows quality and reliability at its finest from SecureLine....

Models

FireSec Cabinet is available in three sizes with moveable shelves. A self-fixing hanging file is also available.

Tested and certified

FireSec Cabinet is certified to DIN 4102 fire standards which means that even after being subjected to the intense heat of a fire lasting 30 minutes your documents remain in a readable condition.

Quality

Manufactured under an ISO9001 approved process. The units are then further subjected to continuous external control throughout the manufacturing process.

Locking

FireSec Cabinets have three way mains boltwork secured by a high security double bitted keylock.

Design

The cabinets will complement your office environment in colour, design and size. They have a sophisticated modern look which is finished in an off white colour.
