

Secure Cabinet

- for protection of cash and valuables

Looking for a high specification cabinet to protect valuables? Well, the 'Secure Cabinet', range does just that. Constructed from the highest specification materials, it features combine to provide the greatest protection against burglary attack. The cabinet can be used to store a wide range of low value, bulk items. Goods recommended for storage include mobile phones, phonecards and cigarettes. All in all, the Secure Cabinet is another fine example of SecureLine implementing value within its products.

Models

The Secure Cabinet is available in three models.

Construction

Both door and body are constructed from 6mm plate steel. Vital areas within the door are protected by additional plates.

Boltwork

Doors are secured by three-way moving boltwork; a fixed dogging bar further secures the hinge side of the door.

All moving bolts are of 22mm diameter.

A relocking device is fitted in case of physical attack to the locking mechanism.

Base Fixing

Four points at the base of the cabinet allow the cabinet to be anchored to the floor.

Shelving

All sizes come supplied with 4 adjustable steel shelves.

Locking

All models are secured by a single double bitted keylock as standard.

Design

The cabinets will complement your office environment in colour, design and size.

They have a modern look which is finished in a light grey colour.
